

Owners Manual

PBS80W

PBS80B

WARNING Indicates a potentially hazardous situation which, if mishandled, could result in death or serious personal injury.

Install the speaker only in a location that can structurally support the weight of the speaker and the mounting bracket. Doing otherwise may result in the speaker falling down and causing personal injury and/or property damage.

How to use

1. Careful attention should be required for the polarity when more than two speakers are in operation at the same place, otherwise the sound of poor quality and/or sound pressure of low level will be reproduced. Connection should be made in the same way as in the case of battery, same polarity with parallel connection and different polarity with series connection.
2. Do not operate the unit for an extended period of time with the sound distorting. This is an indication of a malfunction, which in turn can cause heat to generate and result in a fire.

3. To avoid electric shocks, be sure to switch off the amplifier's power when connecting speakers.
4. Connect the speakers to be equal the total input power (wattage) to the output power of amplifier for high impedance connection. It means the impedance matching.

Technical data	PBS80W PBS80B
Load rating	100w
Transformer tapings	10/5/2.5W(70V)
Frequency range	150-15KHz
SPL(@1W/m)	92dB
Speaker Ø(mm) and Impedance	6 ½"/8ohms
Dimension Ø, Install depth	Ø270(570)mm
